

The Hard Facts

L.L. Geans Builds Trench Drain for Federal-Mogul

Project Overview

- Sawcut and remove existing concrete floor
- Excavate and remove soil and drains
- Assist Federal-Mogul employees in the installation of a drain line
- Install concrete slab, footings and walls
- Meet OEM's tight deadline for machine installation

"We've used L.L. Geans for many projects because they go above and beyond. This wasn't an easy job and I was extremely satisfied with L.L. Geans' work."

—Bill Hayes
Maintenance Planner
Federal-Mogul

Formwork is completed and ready for the final concrete placement.

"We appreciate the work Federal-Mogul has given us over the years and we really enjoy the challenges of trench drain projects," said Rocky Geans, President of L.L. Geans. L.L. Geans also specializes in concrete machine pits and bases, and all other types of construction work in the industrial environment.

An aspect of industrial work that L.L. Geans takes very seriously is safety training. "We like to share photos of our work, but what you don't see are the safety skills and tools we used to keep our team and Federal-Mogul's workers safe. Our employees realize that good safety practices begin with themselves," added Rocky.

In addition to large, complex jobs, L.L. Geans welcomes smaller projects and this is a great time of year to get those interior maintenance and repair tasks done. We pride ourselves on meeting tough deadlines and minimizing downtime in your facility. ■

The finished project—the trench drain is ready for the installation of two aluminum die casting machines.

Concrete Services

- Building Foundations
- Floor Slabs
- Parking Lots

L.L. Geans Installs Column Footings for Dearborn Crane

Project Overview

- Sawcut and remove concrete
- Excavate and remove soil
- Install rebar, dowels and concrete for 29 column footings

Ray Lyvers, an Engineer with Dearborn Crane, needed column footings before he could install two 10-ton cranes, both with a span of 86 ft., for a local manufacturer. Dearborn Crane designs, builds, installs and services Bridge, Jib, Gantry, and Work Station Cranes, and Hoists.

“Precision was key in this project since the column footings support the entire crane structure. L.L. Geans completed the project on time and provided exactly what we wanted. We’ve used them in the past and always had great results,” said Ray.

L.L. Geans specializes in the type of work they did for Dearborn Crane—precise, on schedule and within budget. The L.L. Geans’ crew looks forward to working with you on your next project. ■
